

JITENDRA BORDIYA

Full Stack Developer | MERN Stack & .NET Core | Gen AI Enthusiast

jitendra7496@gmail.com | +91 9516882873 | Pune, India |
<https://linkedin.com/in/jitendra-bordiya-b88b86175>

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years building enterprise-scale SaaS platforms for property management, land lifecycle, and commodity trading. Currently leading MERN stack development for SLM platform serving 5000+ users managing 100K+ properties. Specialized in API architecture, database optimization (100K+ daily transactions), secure cloud infrastructure, and modern Gen AI tools. Demonstrated track record: 45-60% performance improvements, enterprise-grade feature delivery, team mentorship.

PROFESSIONAL EXPERIENCE

MERN Stack Developer, Irth Solutions | 01/2024 – Present

Stakeholder & Land Management (SLM) | 5000+ Users | 100K+ Properties | Pune

- Architected 22+ RESTful APIs (Node.js/Express) handling 2000+ daily requests, sub-100ms latency
- Built React (v18+) dashboards for 150+ enterprise customers; property portfolio, stakeholder tracking, compliance reports
- Designed optimized MongoDB schemas with geospatial indexing; reduced query latency by 45% (800ms → <100ms)
- Implemented JWT authentication, role-based access control (RBAC), multi-tenant isolation for enterprise security
- Integrated third-party mapping APIs (Google Maps, Mapbox); improved data accuracy by 35%
- Leveraged GitHub Copilot (30% faster features) and Claude AI for architectural design and optimization
- Led code reviews and architectural discussions; mentored team on scalability and security best practices

Full Stack Developer (.NET Core + Angular), Irth Solutions | 05/2023 – 03/2024

Irth Land Management (ILM) | 8000+ Properties | 40+ Organizations | Pune

- Designed and deployed 18+ ASP.NET Core 7/8 APIs for property lifecycle, workflows, compliance tracking
- Developed Angular (v16+) dashboards with real-time property updates, automated workflows, compliance alerts
- Optimized SQL Server queries (indexing, execution plans); improved dashboard load time by 35% (4.5s → 3s)
- Implemented Azure DevOps CI/CD YAML pipelines with automated testing, zero-downtime deployments (2 weeks → 3 days)
- Integrated Azure Key Vault for secrets management; deployed microservices to Azure Container Apps with autoscaling
- Conducted 50+ peer code reviews; mentored 3 junior developers (2 promoted to senior roles)

Software Engineer, Fendahl Technology | 11/2021 – 04/2023

Commodity Trading and Risk Management (CTRM) Platform | Nagpur

- Optimized trade settlement processing reducing time by 60% (5+ minutes → <2 minutes) for 100K+ daily transactions
- Designed normalized SQL Server schemas supporting complex trade data relationships and high-frequency operations
- Built settlement logic, regulatory compliance reporting, and contract management features using .NET and C#
- Resolved critical production incidents reducing system downtime by 40%

EDUCATION

Bachelor of Engineering (Information Technology) | 2020

Sagar Institute of Research & Technology Excellence, Indore | GPA: 6.9/10

TECHNICAL SKILLS

Backend: Node.js, Express.js, C#, ASP.NET Core (.NET 6/7/8), JWT, Middleware, Service Architecture

Frontend: React (v18+), Angular (v16+), TypeScript, JavaScript ES6+, HTML5, CSS3, Redux, Context API

Database: MongoDB, Mongoose, SQL Server, Entity Framework Core, Geospatial Queries, Query Optimization

DevOps/Cloud: Azure DevOps, CI/CD (YAML), Docker, Container Apps, Key Vault, Git/GitHub, Infrastructure as Code

Gen AI Tools: Cursor IDE, GitHub Copilot, Claude AI, Prompt Engineering, AI-assisted code reviews

CERTIFICATIONS

- Azure Fundamentals (AZ-900) — Microsoft Azure
- MongoDB Associate Developer (In Progress)
